Welcome to CK Cattle's Seventh Headquarters Sale,

It is that time of the year again. As I sit down to write this welcome note, I began by reading my past letters. There were three things that I mentined in each letter: The weather, the cattle market and our sale offering. So here goes...

We have had a wet year. This has been the most difficult year in my 40+ years of putting up hay. We had hay rained on 9 days in a row. I don't think we put up any hay without dealing with some moisture challenges. You appreciate silage in a year like this. As I write this letter, we just put off videoing sale cattle due to rain! I know our many friends out west would rather be dealing with mud than drought but we are ready to dry out.

Positive optimism is the best way to describe the cattle market. All indicators are leading in the right direction. The only negative thing I see is high corn prices, but a looming big crop could help that situa-tion. It is no doubt that the cattle cycle puts us in good shape for better prices.

Our sale offering has been the one constant from year to year. We started with almost 100 bulls and 60 females and have only increased our bulls slightly to 130 this year. We will again have about forty 18 to 20 month old bulls to go with the solid 2-year-olds. The females will be a combination of first calf heifers along with 4 and 5-year-old cows. I am proud to say that our females go to a mix of registered and commercial buyers each year.

We are humbled by the support shown to us in our program. In a strange environment last year one of our biggest problems on sale day was parking! Our #1 goal in this operation is to produce cattle that work for our customers. We are working with Genomics and \$values but also striving to keep our cattle functional as our number one goal. We have put emphasis on using our own bulls to ensure we are not getting too far off base chasing numbers. Come by early and allow us to show you the sale cattle personally.

Thanks for your consideration and God Bless.

Chuck and Katie Madaris

Darren Russell

The CK CATTLE Headquarters Sale Information

Schedule:

Thursday, October 28th

All day Cattle On Display at the Farm

Friday, October 29th

11:30 am Complimentary Lunch

Noon CK Cattle Headquarters Sale

Sale Staff:

Tommy Barnes, Auctioneer	334-462-4004
Will Harsh, Am. Angus Assn.	740-272-1386
Cracker Johnson, Special Assignment	352-535-5320
Mark Sims, Special Assignment	580-595-0901
Richard Dyar, Special Assignment	816-390-6601
Reid Blossom, Special Assignment	334-324-4113

Special Guests:

Erin Beasley, Exec. VP Alabama Cattleman's Assn.
Clay Kennamer, President Alabama Cattleman's Assn.
Andy Hepburn, Pastor Hayneville Baptist Church
Dick Farrior and Scott Garrett, Mid State Stockyards
Jimmy Sealy, Alabama Livestock Auction
Jerry Etheridge, Montgomery Stockyards

Accommodations:

Hampton Inn	334-280-9592
Holiday Inn	334-288-3858
Fairfield Inn	334-281-6882
Comfort Suites	334-676-2576
Best Western	334-280-0306

Air Travel:

Birmingham-Shuttlesworth Int. Airport is approximately 1 hr. and 30 minutes to the farm and is serviced by most major carriers. Montgomery Airport is 5 miles from the farm. CK Cattle will gladly pick up anyone flying into Montgomery. Please call in advance to arrange pick up.

Trucking:

Tom Snell	580-374-4168
Brian Wyatt	423-240-5533

Livestock Insurance:

Cam Winterburn	931-309-8428
Jamie Secondino Krieger	812-208-0956

Catalog:

Kathleen Evans	334-657-5850
----------------	--------------

Sale Format:

In an effort to reduce the stress on the sale cattle and ourselves, all cattle have been videoed and will sell via TV screens in the sale barn. No animals will walk through the sale ring. As always, all cattle will be displayed live in pens the day before the sale, as well as sale day, for your evaluation.

Sale Videos:

Sale videos and pedigrees can be viewed prior to the sale at www.ckcattle.com and www.dvauction.com/video_catalogs.

Online Bidding:

Online bidding will be available through DV Auction. To watch or bid online, visit www.dvauction.com to register and apply for bidding prior to the sale. If you have any questions or to finalize your bidding application, please call DV Auction at 402-316-5460.

DVAuction
Broadcasting Real-Time Auctions

Phone Bidding:

Anyone wishing to bid by phone during the sale may do so by contacting any of the CK Cattle family, or a member of the sale staff. Please call us several days in advance if possible, so we can line up a CK representative to handle your phone bidding.

Absentee Bidding:

If you cannot attend the sale, and prefer not to bid online or the phone, we will be glad to personally help with your order. Call Chuck, Charlie or Bradfield prior to October 24th, if possible, and give us your parameters and price range. Your bid will be handled confidentially and professionally, spending your money as if it were our own. We are happy to assist with cattle selection prior to sale day and are willing to show you the cattle by appointment anytime.

Semen Interest:

CK Cattle will retain 1/3 semen interest in every bull selling. In reality this will affect very few bulls that sell. CK Cattle reserves the right to collect semen on any bull at our expense and at the buyer's convenience. CK retains 1/3 of all the semen revenue rights for each bull. The buyer receives 100% possession.

Terms & Conditions:

Terms of the sale are cash or check and each animal will be sold to the highest bidder with the auctioneer settling any disputes as to bids. Announcements made from the auction block will take precedence over any printed material. Each animal will become the property of the buyer as soon as sold and will be taken care of for a reasonable amount of time after the sale at the buyer's risk. We strongly advise buyers to insure their purchases.

Guarantee:

All bulls are guaranteed to be breeders. Any bull failing to successfully breed females within 6 months of sale date may be returned to the seller if in good condition, and if accompanied by a letter from a veterinarian stating the problem. The purchaser must notify the seller of his dissatisfaction with an animal within 6 months of the sale date. Seller then reserves the right to try said animal for a period of 6 months. If at the end of that time, the animal fails to breed, a like animal will be substituted or a credit will be issued.

If a female sold as "Safe in Calf" proves not to be in calf, the seller must make a satisfactory adjustment on the purchase price to the buyer, or at the buyer's option, refund the purchase price upon return of the animal to the farm of the seller. Any claim for adjustment or refund must be made to the seller within 6 months of the date of the sale.

If a female represented as "Safe in Calf" to a certain bull at the time of sale proves to have been bred to a different bull, the seller must make a satisfactory adjustment on the purchase price to the buyer, or at the buyer's option, refund the purchase price upon return of the animal (and calf if applicable) to the farm of the seller. Any claim for adjustment or refund must be made to the seller within 1 year of the date of sale.

Liability:

All persons who attend the sale do so at their own risk and the owners assume no liability, legal or otherwise, for any accidents which may occur.

Hair Coat Comments

Hair coat is one of the most under looked traits in cattle, yet it makes a tremendous economic impact on cattle in the deep south. Here at CK Cattle we have been hair scoring our cattle for years to see how well they perform in our hot and humid environment. We are geographically located at the very most southern tip of the U.S. fescue belt. Cattle with hair simply struggle in our environment, which is why most of our neighbors and customers in the fescue belt use brahman influence to mitigate the dirty fescue. We feel that the most valuable time to take hair scores on our cows is in the late spring after they have been exposed to fescue for several months. It is this time of year we want to see our animals showing 25% or less of her winter coat.

CK Hair Score guidelines

- 1 - 0% hair (Slick)
- 2 - Up to 25% hair coverage
- 3 - Up to 50% hair coverage
- 4 - Up to 75% hair coverage
- 5 - 100% hair coverage, has not shed at all.

Our calves are hair scored during the mid-summer, as we feel this is the most crucial time for a calf to be slick. At this time of year many of the calves in our area have been weaned and are being fed a grower type ration and are already battling heat stress, so any added hair at this time of year will certainly create issues in performance. We can attest to the fact that hair is directly related to performance in our operation. Years of CK data shows that calves keeping 50-100% of their hair coat will certainly sacrifice pounds to those animals that are slick.

When selecting genetics to use in our program, we will only use a bull born here at CK if his hair score was a 1 or a 2 as a calf. We have used this in our selection criteria for many years, which has given us an angus cow herd that is extremely adaptable to the U.S. fescue belt and gulf coast regions.

We are very pleased to see that the American Angus Association has started developing a hair score EPD to help both seedstock and commercial producers choose animals that respond better while grazing fescue.

How The Bulls Are Raised:

All bulls are born on our operation in Lowndes County AL. We have a mix of Black Belt prairie soil, which is predominantly Fescue grass, and Sandy soil which is usually Bermuda grass. The bull lots are 10 to 20 acres dominated by fescue with fence line bunks.

Our fall calves are born September thru December. We work our calves for the first time around 4 months of age. This is when we make our first round of culling the bull calves. We start by culling any excessive birth weight or calving problems and obvious disposition and quality problems. We give our second round of vaccinations about 60 days later (still on the cow), at which time we collect our weaning weights, disposition and hair scores. We fence line wean around 7-8 months of age according to pasture grass conditions.

When bulls are weaned they go into groups of 30 to 50 head and fed a high roughage ration consisting predominantly of corn silage, soy hull pellets and dry distillers grain. We strive to have our bulls gaining at or above 2.5 lbs/day. Due to the high moisture and high roughage content of our ration, coupled with the heat and humidity in our area, the bull calves that do not perform in our environment will sort themselves out.

At yearling we collect weights, scrotal, frame and ultrasound data. All yearling bulls are freeze branded in December. It is then we select the group of bulls we will be using in our program as yearlings. All yearlings used on the CK Cattle operation will be returned to our bull development program after being pulled at the end of the breeding season. These bulls will then be offered for sale at 2 years of age at our Headquarters sale. We will provide a footnote in the catalog on any bull used in our program as a yearling. We are continually culling bulls. Some soundness and feet issues really start to appear at around 15-18 months. This is another big plus for buying two year olds bulls, as it is very difficult to see some these issues before the bulls have a chance to fully mature. All bulls are trich tested and will have passed a bull soundness evaluation within 30 days prior to October 29 th , 2021.

Ellis Ann on Big Mike moving bulls. The kids are beginning to be real big assets here!

CK Genetics in the Feedyard:

We retained ownership of 178 fall calves born here at CK. These animals were harvested in the spring of 2021 in Kansas. All the cattle were fed at Nextgen Cattle Co. feedyard in Hugoton, KS. We had very minimal health issues which we attributed to our vaccination protocol. Our data continues to get better at the feedyard and on the grid.

- 178 Fall calving calves harvested
- 98.31% graded USDA Choice or higher
- 12.35% graded USDA Prime
- 56.18% graded CAB (Certified Angus Beef)
- Carcass weights averaged 884 lbs

That means right at 68.53 % of our fed animals graded CAB and Prime.

We feel very confident that our bulls sire black, polled, large #1 feeder calves. These offspring are what puts the most money in the cow man's wallet. You can find all of our 2017-2021 feedyard grid information on our website www.ckcattle.com by clicking the "CK Feedyard Performance Data" link on the menu.

Definiton of CK EPDs and Performance Data:

With 3 Breeds in our Program, we must use different sire evaluation programs. We became aware of ASA's THE (Total Herd Enrollment) Program, and we enrolled our entire cowherd into one database using this system. We have kept our Angus cows also enrolled in AHIR and Maternal Plus. The Angus Cattle will be sold using the AAA EPD averages. The Chiangus and Simangus Cattle are will be sold using EPDs generated through the International Genetic Solutions (IGS) Multibreed Evaluation.

The EPDs reported in this catalog are the Fall numbers, as reported by the American Angus, American Chianina or American Simmental Associations. As these numbers are updated regularly, please refer to the respective Asociations website for the current numbers.

The CK CATTLE Angus Program

The CK Cattle Angus program has strived for decades to produce bulls that work in our deep south environment. We have done this by utilizing high performing CK bulls that hit the performance metrics we need as well as meet the phenotypic criteria that we demand. These animals MUST perform in our environment! We also use proven outside genetics from sires in the breed that we feel mirror our criteria and allow us to reach maximum potential.

- Virgin Bull.
- Pathfinder dam.

Trevor Haney took a break from Mississippi State to come work with us this summer.

And on the 8th day, God looked down on his planned
paradise and said, "I need a *Caretaker*."

So God made a *Farmer*.
- Paul Harvey

*We support your role of Caretaker and
Farmer by offering a variety of land
and farm loans. Call us today!*

The CK CATTLE Chiangus Program

Our Chiangus Cattle are a composite breed made up of Chianina and Angus. These animals all have different percentages of Chianina, but most of our bulls will have between 5-25% Chianina and the balance is angus. We let our environment select that range for us as we don't select for a specific percentage.

These cattle are multi generation Chiangus. You may have to go back 30 years or more to find a fullblood Chianina animal in many of their pedigrees. Our Chiangus bulls tend to have a slicker hair coat and a more muscular type than the angus bulls. These bulls also show a longer growth curve in their calves, meaning they continue to gain and grow muscle at the feedyard level. That is why we continue to breed Chiangus- ADDED VALUE for the commercial cattlemen.

The Other Half

Written by Morgan Boecker, Certified Angus Beef

Originally printed in the Angus Journal

The right person standing beside you is often the difference between success or failure. It's paying bills, entering data, answering phone calls and running errands for a tractor part. It's also watching kids, preparing meals and sweeping floors. The unspoken "thank you" to ranch women often goes unnoticed, yet the room fills with gratitude at suppertime. A presence that carries more than its own weight. "My role as wife and partner is to meet everyone's needs, basically," Katie says. It's an evolving role that changes as the kids grow up, move away and then come back. For Katie, her job used to be feeding the bulls by hand. "They were pretty gentle," Katie says, "but as they got bigger, I'd carry a big stick." As pens expanded and filled with more bulls over the years, Katie's buckets upgraded to a feed wagon. "Times change, so we try to live by what we need and not what we want," she says as the official bookkeeper. She's good at spotting unnecessary purchases and extending the checkbook for things that will make the operation more efficient and improve the land. Before Kathleen came home to the family business, she enjoyed a career as a teacher and coach, but could feel in her heart that she belonged on the farm. "Sometimes I'm just a helper," Kathleen says, "but I think there is value in that." Taking 10 minutes to give someone a ride or spending an afternoon cutting hay may save someone else hours needed elsewhere. There's flexibility knowing she can do it all, but she doesn't have to every day.

There's greater purpose for their work, but it's shared goals and values that keep everyone on track.

Making good use of all the hands. If your mail is a little crooked just know the stickers are put on with love.

Corteva Agriscience™ Your Pasture Partners

HERBICIDES

DuraCor® GrazonNext® HL PastureGard® HL Remedy® ULTRA

The Partner You Want.

Pasture. It's your lowest-cost feed source.

And when weeds and brush get in the way, you need solutions — simple solutions — because you've got enough to manage.

Range & Pasture products from Corteva Agriscience™ deliver just that, so you can meet any challenge and grow the best pasture and maximize your profit potential.

For More Information About Corteva Agriscience™ Range & Pasture Products, Contact Jacee May at: jacee.may@corteva.com

™&® Trademarks of Corteva Agriscience and its affiliated companies.

Under normal field conditions DuraCor® is non-volatile. DuraCor and GrazonNext® HL have no grazing or haying restrictions for any class of livestock, including lactating dairy cows, horses (including lactating mares) and meat animals prior to slaughter. Label precautions apply to forage treated with DuraCor and GrazonNext HL and to manure and urine from animals that have consumed treated forage. GrazonNext HL is not for sale, distribution, or use in New York State and San Luis Valley of Colorado. Not all products are registered in all states. State restrictions on the sale and use of Remedy® Ultra apply. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your state. Always read and follow label directions. CR35 000 053 (09/21) 010-59122 ©2021 Corteva

4631 County Road 37 S Hope Hull, AL 36043

Casey Feed LLC

Feed, Seed, Hardware, Fencing and Firearms we have it all.

Dwight Casey Dustin Casey Warren Casey

Store Hours:

Monday - Friday 7 am to 5 pm
 Saturday 7 am - 12 pm • Closed Sunday

Casey Feed is open on Friday, October 26th and only minutes from CK Cattle.

From CK Cattle, take a left onto Mason Rd. and go 2.5 miles until dead end onto County Rd. 37. Take a left on County Rd. 37 and travel 3.5 miles and Casey Feed is on the left.

Your local source for soy hull pellets, corn gluten and DDG's. We gladly welcome your business!

Ellis Ann entered 3 steers in the American Simmental Association Steer Profitability Contest. She worked hard at monthly assignments and learned a lot. We were proud of her and how her steers performed. She had the 10th overall steer in the competition and the 3rd overall pen of three. She had Reserve Champion Communication Honors in the Junior Division.

Bradfield suffered a major injury this year breaking his femur. It didn't keep him down long as he had a remarkable recovery; up and riding horses and skiing in no time.

• Safe to Lot 4 (E783G) with a heifer calf.

Birth Weight Comments:

Birth weight is one of the most discussed performance items to potential bull customers. Due to that, I am going to go into detail about my opinions on that subject. First of all, here at CK we actually weigh all of our calves and turn in actual birth weights. I repeat, we actually weigh them. This is the most difficult weight to get and the most important weight to get right. To get this weight, you must collect it within 24 hours of birth, catch the calf while avoiding a protective mother and be able to physically pick up and weigh the calf. We use scales that are accurate to the pound, so there is no guessing.

Birth Weight is also very relative to time of the year. Due to that, here are our opinions on that subject. Birth weight is affected by temperature with calves born in hot weather tending to be born light and colder weather calves being heavier. This is probably due to length of gestation and more blood flow to fetus in cold weather. The calves born here in late September and October are always lighter than the calves born in November and December. The January, February and March calves will trend heavier.

We have found that the heavier the birthweight on our calves, the heavier the weaning weights we are recording. We are utilizing heavier birthweight bulls on mature cows only, and it has not had any effect on our calving - Added pounds means added profit. We have found that with heifers

increased birth weight has created more issues at calving. That being said, added BW in mature cows is not generally a problem, but calving ease bulls on heifers is recommended. Take these considerations in mind as you make your bull selection. Remember, birth weight is more important in heifers, so use the Actual Birth Weight, Calving Ease and Birth Weight EPDs of the bulls to make your selection.

Data collection starts early. Chuck is tagging this calf as Mama is patiently waiting.

Headquarters Sale

Friday, October 29, 2021 12 NOON CST

Not all jobs are fun!

Cousin Crew Picnic

Work hard, play hard, enjoy the small things

Cute Muttin Busters

Hot summer day finding puddles

Molly is getting the hang of Joe

Our friend, Clyde, helping us work today

Plenty of rain made a good corn crop

Now the real work begins

Trouble in Paradise
